Objective

Computer Science student specializing in Full-Stack Development and system architecture. Seeking a Full Stack Development Internship to apply expertise in React.js, Node.js, and SQL to build scalable web applications and efficient backend solutions.

Education

Hussein Technical University (HTU)
Bachelor of Computer Science GPA: 3.1/4.0

October 2022 – January 2027 (Expected)

- Relevant Modules: Advanced Programming, Database Systems, Software Architecture, Data Structures & Algorithms, Web Development, AI & Intelligent Systems
- Extracurricular: 4th Place Finalist (Rocket Pitch 2024), INJAZ Incubation Awardee, Certified Sports Coach & Nutritionist.

Experience

Rocket Pitch Competition – INJAZ Amman, Jordan
Co-Founder & Team Lead – Madmoon

Jan 2024

- Co-developed the technical MVP design for a secure escrow service and pitched against 100+ teams to reach the Top 4 finalists.
- Led the technical design of secure transaction flows and user journey logic for web and mobile platforms.
- Won an INJAZ incubation award to further develop the product’s technical infrastructure and business model.

Deanship of Student Affairs – HTU, Amman, Jordan

May 2023

Student Volunteer

- Assisted new students during orientation and onboarding
- Provided guidance on campus facilities, services, and academic procedures

Projects

Fitness Coach Platform | Personal Project [Github](#)

2024

React.js · Node.js · PostgreSQL · REST API

- Built a production-ready dual-role web application (React.js, Node.js, PostgreSQL) with role-based access, REST API, and secure authentication.
- Engineered dynamic dashboards for coach and client with real-time progress monitoring and full client-server communication flow.

LearnPath AI – Intelligent Course Navigator | Capstone Project [Github](#)

2026

Flask · JavaScript · LLM · Embeddings

- Developed an AI-powered web platform (Flask, JavaScript, Groq API) providing personalized learning roadmaps via LLM and embedding-based search.
- Orchestrated integration between frontend, backend services, and external REST APIs through clear interface definitions.

CMR Center Management System | Advanced Programming Course [Github](#)

2024

Java · Design Patterns (Factory, Bridge, Iterator, Facade)

- Built a full business management system in C# applying Factory, Bridge, Iterator, and Facade design patterns with a complete integration test plan.

Perfumize – Luxury Fragrance E-Commerce [Github](#)

2024

HTML5 · CSS3 · JavaScript · PHP 8.x · MySQL · XAMPP

- Built a full-stack e-commerce platform (PHP, MySQL) with a dynamic product catalog, shopping cart, user sessions, and customer reviews.
- Designed a responsive, minimalist UI with seamless collection filtering and smooth checkout flow.

Other: Library Management System (SQL/PostgreSQL), Personal Portfolio (React.js) [Github](#)

Skills

- Native/Advanced:** JavaScript (React.js, Node.js), SQL (PostgreSQL), HTML5/CSS3, PHP, Git/GitHub, Arabic
- Intermediate:** Python (Flask), C, Java, REST APIs, System Design, UX/UI Prototyping (Figma), English
- Tools:** Draw.io, Power BI, Mermaid.js, Agile/Scrum, Microsoft Office Suite
- Interests:** Certified Sports Coach & Nutritionist 5+ years of hands-on client experience
